## DETAILED ACTION

### *Continued Examination Under 37 CFR 1.114*

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 01/19/2007 has been entered.

### *Drawings*

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the process for transferring data from a data-preparing device to a data-requesting device including the various process steps must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an

Art Unit: 2181

application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### *Specification*

3. The disclosure is objected to because it contains an embedded hyperlink and/or other form of browser-executable code. Applicant is required to delete the embedded hyperlink and/or other form of browser-executable code. See MPEP § 608.01.

### *Claim Rejections - 35 USC § 102*

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 10-11, 13-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Moriya U.S. Patent Number: 6,161,140 (hereinafter "*Moriya*").

6. Referring to claim 15, *Moriya* teaches a process for transferring data from a data-preparing device to a data-requesting device [see abstract], comprising: the data-requesting device requests, over a network, data to be transmitted to it by the data-preparing device [see

Art Unit: 2181

abstract; figure 2, elements 10a-c, NW, 202, 201; figure 4, 'Display Size'; column 3, lines 25-41; Figures 9A and 9B]; the data-requesting device transmits to the data-preparing device over the network information data about the capabilities of the data-requesting device, said information data transmitted by the data-requesting device including a list of usable display formats for the data-requesting device [see abstract; figure 2, elements 10a-c, NW, 202, 201; figure 4, 'Display Size'; column 3, lines 25-41; Figures 9A and 9B]; the data-preparing device then, according to availability at the data-preparing device, selects the best-suited display format from the list of usable display formats transmitted by the data requesting device [see abstract; figure 2, elements 10a-c, NW, 202, 201; figure 4, 'Display Size'; column 3, lines 25-41; Figures 9A and 9B]; and the data preparing device then transmits data over the network to the data-requesting device in the selected display format [see abstract; figure 2, elements 10a-c, NW, 202, 201; figure 4, 'Display Size'; column 3, lines 25-41; Figures 9A and 9B.]

7. **Referring to claim 10**, *Moriya* teaches wherein the information data are transmitted to the data-preparing device over a device engaged between the data-requesting device and the data-preparing device [see abstract; figure 2, elements 10a-c, NW, 202, 201; figure 4, 'Display Size'; column 3, lines 25-41; Figures 9A and 9B.]

8. **Referring to claim 11**, *Moriya* teaches wherein the requested data are stored in a central data bank of the data-preparing device and, on call, are formatted by a formatting device into the pre-determined data format and transmitted to the data-requesting device [see abstract; figure 2, elements 10a-c, NW, 202, 201; figure 4, 'Display Size'; column 3, lines 25-41; Figures 9A and 9B.]

Art Unit: 2181

9. **Referring to claim 13**, wherein the requested data are stored in a central data bank of the data-preparing device and, on call, are formatted by a formatting device into the predetermined data format and transmitted to the data-requesting device [see abstract; figure 2, elements 10a-c, NW, 202, 201; figure 4, 'Display Size'; column 3, lines 25-41; Figures 9A and 9B.]

10. **Referring to claim 14**, *Moriya* teaches wherein the requested data are stored in a central data bank of the data-preparing device and, on call, are formatted by a formatting device into the predetermined data format and transmitted to the data-requesting device [see abstract; figure 2, elements 10a-c, NW, 202, 201; figure 4, 'Display Size'; column 3, lines 25-41; Figures 9A and 9B.]
